IN MEMORY

From 1973 through 1987, West Virginia has had the distinction of being the state with the lowest crime rate in the nation.

The entire law enforcement community and the citizens of the State of West Virginia should be applauded for the cooperative effort which made this distinction a reality. The 1987 edition of "Crime in West Virginia" is dedicated to those law enforcement officers who have paid the supreme sacrifice in the protection of their communities. ARCH A. MOORE, JR.
GOVERNOR

GREETINGS FROM THE GOVERNOR

I would like to take this opportunity to express my sincere appreciation and to gratefully acknowledge the excellent cooperation of all the contributing agencies that provided, under stringent rules and regulations, the data necessary to produce this 1987 edition of "Crime in West Virginia."

Information contained in this publication provides comprehensive, statewide data concerning crime in West Virginia and represents a concerted effort by all contributing law enforcement agencies in identifying and reporting criminal activity throughout the State.

I am proud to announce the 1987 statewide crime rate is 5.3 percent lower than the 1986 level. This is true, even though there was a national increase in actual crime of 2 per cent. West Virginians should be honored to have law enforcement officers in their State, who through diligence and hard work have provided West Virginia with the lowest crime rate in the nation for the past fourteen years.

When I hear the term "Almost Heaven, West Virginia," I am keenly aware that it would not be true without the dedication of the law enforcement officers in this State of West Virginia.

Sincerely yours,

Arch A. Moore, Jr.

The Honorable Arch A. Moore, Jr.
Governor of West Virginia

Dear Governor Moore:

I am pleased to submit the Sixteenth Annual Report on Crime in West Virginia. This report is constructed and delivered in accordance with Chapter 15, Article 2, Section 24 of the Code of West Virginia. The information is based upon monthly statistics submitted by law enforcement agencies within West Virginia for the year 1987.

The purpose of this report is to provide reliable data, of a comprehensive nature, to the criminal justice community. It is the intent of the legislation and our hope that both the graphic and statistical representations of crime factors will be an aid to law enforcement personnel in planning crime prevention activities throughout the State of West Virginia. While the nation as a whole had an increase in actual crime in three of the past six years, West Virginia crime has decreased in five of the past 6 years.

We are extremely proud of the cooperation received from the entire West Virginia law enforcement community. This year, for the second straight year, the Uniform Crime Reporting Program recorded a one hundred percent submission rate for the three hundred plus entities which report UCR data. We commend their dedication and their efforts in working for a better West Virginia.

Sincerely yours,

INTRODUCTION

The West Virginia Uniform Crime Reporting (UCR) Program is a uniform, statewide method of collecting statistical crime data, under the direction of the Uniform Crime Reporting Section of the Criminal Identification Bureau, West Virginia Department of Public Safety. Its purpose is two-fold:

1. To provide a consolidated annual report concerning crime in West Virginia, and
2. To report state-wide crime statistics from a single agency to the Federal Bureau of Investigation

National Uniform Crime Reporting Program

The counterpart of all state-wide UCR programs is the National UCR Program under the direction of the Federal Bureau of Investigation. This National program was the result of a need for nation-wide uniform compilation of crime statistics. Uniform Crime Reports were first collected in 1930 after being developed by a committee of the International Association of Chiefs of Police. Today the IACP continues to serve in an advisory capacity to the FBI in its operation of the UCR program.

In the last several years the FBI has been actively assisting individual states in the development of state-wide programs for the collection of law enforcement statistics. Although individual UCR programs may vary from state to state, all state programs must be compatible with the National UCR Program. Presently there are 41 operational state-level UCR Programs. Crime statistics submitted by individual law enforcement agencies from all fifty (50) states, whether reported through state-level UCR programs or directly to the FBI, are presented annually in the FBI's Uniform Crime Reports publication, **Crime in the United States.**

West Virginia Uniform Crime Reporting Program

Taking advantage of the invaluable assistance provided, West Virginia developed its own state-wide program for collection of law enforcement statistics.

Purpose and Objectives

The fundamental objectives of the West Virginia UCR Program are:

1. Inform the Governor, Legislature, other government officials, and the public as to the nature of the crime problem in West Virginia, its magnitude and its trends.
2. Provide the FBI with complete crime data to be included in the National crime reports.
3. Provide law enforcement administrators with the best possible data available to help combat individual crime problem areas.
4. Determine who commits crimes by age, sex, race and ethnic origin and by other attributes in order to find the proper focus for crime prevention and enforcement.
5. Provide base data and statistics to measure the workload and effectiveness of West Virginia's Criminal Justice System, to measure the effect of prevention and deterence programs, and to assist in the assessment of social and other causes of crime for the development of theories on criminal behavior.

Development

The West Virginia Legislature, in the Criminal Identification Bureau Act of 1971, established the Uniform Crime Reporting Statute.

Criminal Identification Bureau Act of 1971
Chapter 15, Article 2, Section 24, Sub-Section I

(i) All state, county and municipal law enforcement agencies shall submit to the bureau uniform crime reports setting forth their activities in connection with law enforcement. It shall be the duty of the bureau to adopt and promulgate rules and regulations prescribing the forms, general content, time and manner of submission of such Uniform Crime Reports. Willful or repeated failure by any state, county or municipal law enforcement official to submit the Uniform Crime reports as required in this article shall constitute neglect of duty in public office. The Bureau shall correlate the reports submitted to it and shall compile and submit to the governor and the legislature semi-annual reports based on such reports. A copy of such reports shall be furnished to all prosecuting attorneys and law enforcement agencies.

The responsibility and authority for collection and dissemination of UCR data was given to the West Virginia Department of Public Safety (State Police). This program became operational January 1, 1972.

Reporting Procedure

Under the West Virginia UCR Statute, law enforcement agencies are required to submit specified Uniform Crime Reports. The necessary information for each of the required reports is gathered from each agency's record of complaints, investigations and arrests. Offenses are recorded by the municipality and county in which they occur. Municipal law enforcement agencies report those crimes which occur within the cities, and county sheriff's departments and state police report those crimes which occur within the counties but outside of the cities.

Individual agencies are required to submit uniform crime reports on a monthly basis. Law enforcement agencies report the number of offenses reported to them in the following Part I crime categories:

(1) Criminal Homicide
(2) Forcible Rape
(3) Robbery
(4) Felonious Assault
(5) Breaking and Entering
(6) Larceny/Theft
(7) Motor Vehicle Theft

(Arson became the eighth crime index offense in 1979, however, these statistics are collected in a supplemental form and are shown separately.)

In addition, law enforcement agencies report on a monthly basis supplemental offense information such as the value of property stolen and recovered, the circumstances surrounding homicides and rapes, the age, sex, race and ethnic origin of all persons arrested, and police disposition of juveniles. Police employee data is collected on an annual basis. Information on Domestic Violence is collected on a monthly basis in accordance with House Bill 802, which went into effect July 1, 1981. Summary information on Domestic Violence is included in this addition of **Crime in West Virginia.**

Verification Process

An obvious concern in the collection of crime statistics from law enforcement agencies throughout the state is the uniformity and accuracy of data received. All law enforcement agencies are furnished with the Uniform Crime Reporting Handbook which outlines in detail the proper procedures for scoring and classifying offenses. However, program aides such as guides and instructions do not necessarily guarantee the accuracy and correctness of the reports submitted by the agencies. Additional controls therefore are necessary.

Each report received by the UCR Section is recorded, examined and verified for mathematical accuracy, and, possibly more important, for reasonableness. The elimination of duplication of reporting by agencies receives particular attention. Checks are built into the data processing of the reports to further ensure their validity and accuracy. The UCR Program, however, is still affected to some degree by problems such as incorrect reports, incomplete records, misinterpreted data and human error, as are all statistical programs. In addition, it should be pointed out that there is no way of determining the actual total number of crimes which are committed. Many criminal acts occur which are not reported to official sources. It is for this reason the Uniform Crime Reporting Program focuses its attention on the offenses which are reported to law enforcement agencies.

In spite of these and other shortcomings, the Uniform Crime Reporting Program still provides the best information available concerning crime in West Virginia.

Population Data

The computation of crime rates as they appear in this report by municipality, county and state is based on 1987 population data provided by the Federal Bureau of Investigation through the cooperation and assistance of the United States Bureau of Census.

CLASSIFICATION OF OFFENSES

Uniformity in reporting under the West Virginia System is based upon the proper classification of offenses by police.

The adoption of the Federal System of Uniform Crime Reporting included the utilization of the offense classifications of that system. Law enforcement in this state has made accurate application of those classifications in the reports submitted to the West Virginia Uniform Crime Reporting System.

In view of the need for compatibility with the federal system,"offenses" under the program are not distinguished by designation of "high misdemeanors," "misdemeanors," or violations of municipal ordinances. The explanations of offense classifications may vary slightly with those employed at the federal level because the language used is that familiar to law enforcement in this state. However, the major categories of offense classification remain the same as those employed on the national level.

Part I Offenses

Offense data consists of information that has been extracted from reports of Part I crimes that have come to the attention of West Virginia law enforcement agencies. PROFILE
STATE OF WEST VIRGINIA

West Virginia, truly deserving of its nickname "Mountain State," possesses an abundance of resources — natural, educational and recreational — for its citizens and for visitors to this fine state.

Bordered by the states of Pennsylvania, Maryland, Ohio, Kentucky and Virginia, West Virginia is located between the large population centers of the East and Midwest. Four principal Metropolitan market areas — New York, Chicago, Philadelphia and Detroit — are within a 500 mile radius of the state.

Comprised of 55 counties, with a population in 1987 of 1,897,000 and a density of 78.2 persons per square mile, West Virginia is primarily a rural state. Known best as one of the major coal producing states, West Virginia continues to move to the forefront in terms of energy production, research, and development. In addition to an increased emphasis on coal, natural gas liquids and petroleum continue to be important mineral resources. In the Ohio and Kanawha River Valleys, the chemical industry has become a major economic force in the state. Add to these other resources such as metals and high quality timber from our vast woodlands, and it becomes obvious that West Virginia's economy is quite diverse.

Two areas of improvement West Virginians are quite proud of are in education and in recreation. Advancements in education include three medical schools, an excellent law school, a greatly expanded statewide College of Graduate Studies, as well as many new elementary, secondary, vocational and technical schools throughout the state.

In the area of recreation, West Virginia is a state with an exceptional outdoor recreation base. Its varied topography, climate and resources give it the potential of being a year-round recreation land serving the people of the Eastern United States. With its fine fishing streams, picturesque mountains and abundant forest areas, West Virginia's state parks and forests continue to attract visitors in ever-growing numbers. Skiing has become a very popular winter activity with the State having 4 major ski resorts to offer people in the Eastern U.S.

This profile is presented to help the reader gain a better understanding of the state of West Virginia.

CRIME FACTORS

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of West Virginia and project a state-wide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime-influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role to its suppression and detection. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report "The Challenge of Crime In A Free Society" (1967-Page 92):

> "But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America. They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the criminal justice system is only one part of the government; and the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."

Set forth below are some of the conditions which will, by type and volume, affect the crime that occurs from place to place:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex, race and ethnic origin.

Economic status of the population.

Relative stability of the population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Standards governing appointments to the police force.

Policies of the prosecuting officials and the courts.

Attitude of the public toward law enforcement problems.

The administrative and investigative efficiency of the local law enforcement agency, including the degree of adherence to crime reporting standards.

CRIME INDEX

The tabulations presented in the tables, graphs, and charts in this publication indicate the volume and distribution of crime in West Virginia on the basis of a Crime Index. The crime figures are broken down by municipal, county, regional and state totals.

The Uniform Crime Reporting Program utilizes seven crime classifications to establish an index to measure the trend and distribution of crime in the United States. These crimes—Murder, Forcible Rape, Robbery, Felonious Assault, Breaking & Entering, Larceny/Theft and Motor Vehicle Theft-are counted by law enforcement agencies as the crimes become known to them. These crimes were selected for use in the Crime Index because, as a group, they represent the most common local crime problem. They are all serious crimes, either by their very nature or due to the volume in which they occur. Offenses of Murder, Forcible Rape, Robbery, and Felonious Assault are categorized as Violent Crimes. Offenses of Breaking & Entering, Larceny/Theft and Motor Vehicle Theft are classed as Non-Violent Crimes.

The Uniform Crime Reporting Program is based upon a policy of counting only the most serious offense in situations where multiple offenses have occurred. This rule is known as the Hierarchy Rule and applies only to crime reporting. With the addition of Arson as a Part I crime in 1979, however, it was recognized that Arson normally occurs with other Part I crimes and that important information could be lost by using the Hierarchy Rule as a guide. Therefore, Arson is reported regardless of the crime being committed in conjunction with another Part I offense. Due to complications in absorbing Arson data into the present UCR computer system and due to the newness of statistical data collected, **Arson data is not included in any reference to the Crime Index but is instead reported separately in another section of this report**.

The crime counts set forth in this publication are for actual offenses established by police investigation. In 1987, 41,592 Crime Index Offenses were known to police.

Calculation of Rates and Percentages

Monthly and annual Uniform Crime Reports currently received from 310 municipal, county and state law enforcement agencies in West Virginia represent 100 percent of the estimated West Virginia population. The Department of Natural Resources submits through 6 districts, which cover all 55 counties in the State.

The West Virginia State Police maintain 62 detachments in 55 counties throughout the state. Each detachment is mainly responsible for law enforcement in the rural areas of the respective county. Therefore, there are two law enforcement agencies (state police and sheriff's department) in each county which serve the same area and essentially the same population. Because of this fact, to attempt to compute a crime rate for each of the agencies would be unreasonable. The problem was resolved by combining activity reported by both agencies into one category hereafter referred to in this report as "rural county". However, the number of offenses and the percent of offenses cleared is listed separately for each agency.

This report provides police executives with a yardstick with which to measure local crime problems. To use this report as an administrative tool, data must be converted into rates and percentages. Simple formulas for this purpose are presented below.

Crime Rates

The most used of all crime statistics is the Crime Index Rate, which refers to the number of Crime Index Offenses per 1,000 inhabitants. It can be calculated by either of two procedures.

One procedure is to divide the number of Crime Index Offenses by the population, and to multiply the result by 1,000.

EXAMPLE

$$\frac{\text{1,980 Robberies}}{\text{5,000 Population}} = .396000 \times 1{,}000 = 396.0$$

Crime Rate
Robberies per 1,000 persons

Another procedure is called the reciprocal method. It can be used to calculate crime rates for a number of different offense classifications. The **reciprocal** is determined by dividing 1,000 by the population. The reciprocal can then be multiplied by the number of offenses for each crime to determine the rate per 1,000.

EXAMPLE:

$$\frac{\text{1,000}}{\text{5,000 population}} = \textbf{Reciprocal } 200000 \times \textbf{Number of Robberies } 1{,}980 = \textbf{Crime Rate}$$

396.0 Robberies per 1,000 persons

All Crime Rates which were calculated for the total number of offenses committed in the State were based on the number of offenses per 100,000 persons.

(Due to the fact that no city within the State has a population over 100,000, calculations for each individual contributing agency are based on the number of offenses per 1,000 persons.)

Clearance Rates

For Uniform Crime Reporting purposes, a Crime Index Offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

Crime solutions are also recorded in exceptional circumstances when some element beyond law enforcement control precludes formal charges against the offender. An offense may be exceptionally cleared when it falls into one of the following categories:

1. The offender commits suicide.
2. A double murder occurs (two persons kill each other).
3. The offender dies after making a confession (dying declaration).
4. The offender is killed by a law enforcement officer.
5. The offender confesses to committing the crime while already in custody for another crime or serving a sentence.
6. The offender is prosecuted in another city for a different crime by federal, state or local authorities, or for the same offense, and the other jurisdiction refuses to release the offender.
7. Another jurisdiction refuses to extradite the offender.
8. The victim of a crime refuses to cooperate in the prosecution.
9. The offender is prosecuted for a less serious charge than the one for which he was arrested.
10. The offender is a juvenile who is handled by a verbal or written notice to the parents in instances involving minor offenses such as petit larceny.

For the year of 1987, 23.4 percent of all Index Crimes were cleared as compared to 24.5 percent cleared during 1986. The percentage of Violent Crimes cleared was 64.1 percent in 1987 and 63.1 percent in 1986, while the clearance rate for Property Crimes was 20.7 percent in 1987 and 21.5 percent in 1986.

WEST VIRGINIA OFFENSE DATA

1987

CRIME INDEX OFFENSES

The crimes in this group are all serious, either by their very nature or because of the frequency with which they occur, and present a common enforcement problem to all police.

A total of 41,592 **Crime Index Offenses** were reported for 1987.

August recorded the **highest number of Crime Index Offenses** with 3,836.

There were 2,167.4 Crime Index Offenses **per 100,000 population** in West Virginia.

The **total dollar value** of property stolen during commission of Crime Index Offenses was $33,470,636, of which $10,432,558 was recovered.

A total of 9,740 **Crime Index Offenses** were cleared by arrest or exceptional clearance, a clearance rate of 23.4 percent. Adults were involved in 7,820 of the clearances, and juveniles were involved in 1,920 of the clearances.

There were 10,131 **persons arrested** for Crime Index Offenses; 7,792 of those arrested were males, 2,428 were under 18, and 8,955 were white.

Crime **Index Offenses** can be further **categorized** as a Violent Crime (Murder, Forcible Rape, Robbery, and Felonious Assault) or Non-Violent (or Property) Crime (Breaking and Entering, Larceny/Theft, and Motor Vehicle Theft). Arson is a Property Crime, but is analyzed separately.

Violent Crimes involve the element of personal confrontation between the perpetrator and the victim and are considered more serious than Property (or Non-Violent) Crimes.

A **total** of 2,607 **Violent Crimes** were reported for 1987.

April recorded the **highest number** of Violent Crimes with 259.

There were 135.9 Violent Crimes **per 100,000 population** in West Virginia.

A total of 1,672 Violent Crime Offenses were **cleared by arrest or exceptional clearance,** a clearance rate of 64.1 percent. Adults were involved in 1,558 of the clearances.

There were 1,511 **persons arrested** for Violent Crime Offenses; 1,352 of those arrested were males, 100 were under 18, and 1,271 were white.

A **total** of 38,985 **non-Violent** (or Property) Crimes were reported for 1987.

August recorded the **highest number** of Non-Violent Crimes with 3,617.

FORCIBLE RAPE

DEFINITION

Forcible Rape is the carnal knowledge of a **female** forcibly and against her will. For the purpose of Uniform Crime Reporting, rape is divided into two categories: (1) Rape by Force; and (2) Attempted Rape. Carnal abuse without force (statutory rape) and other sex offenses are not included.

Forcible Rape differs from other violent crimes in that the victim in many cases, is hesitant in reporting the offense to police. The rigors of court procedures, embarrassment and fear of any accompanying stigma have a deterent effect on the victim's willingness to make the crime known to police. The presence of a prior relationship between victim and perpetrator makes the determination of the act of force difficult to establish, and the usual clandestine nature of the offense presents a problem in verification.

FORCIBLE RAPE SUMMARY

1987

A total of 429 Forcible Rape Offenses were reported for 1987.

Forcible Rapes comprised 16.5 percent of the total for the Violent Crime Category and 1.0 percent of the total Crime Index Offenses.

April recorded the highest number of Forcible Rapes with 99.

A total of 302 Forcible Rapes were cleared by arrest or exceptional clearance, a clearance rate of 70.4 percent. Adults were involved in 284 of the clearances.

There were 139 persons arrested for Forcible Rape offenses; 139 of those arrested were males, 12 were under 18, and 119 were white.

Rapes by Force occurred in 359 offenses where as 70 were assaults to Rape.

ROBBERY

DEFINITION

Robbery is defined as the felonious and forcible taking of the property of another against their will by violence or by putting them in fear. The element of personal confrontation is always present in this crime. Under the Uniform Crime Reporting Program, all assaults or attempts to rob are included. Robberies are reported in four general categories - gun; knife or cutting instrument; hands, fists, feet, etc.; and other dangerous weapons. As a general rule, robbery differs from larceny in that it is aggravated by the element of force or the threat of force.

Robbery, as a crime of violence, has a serious impact on the victim. In many instances, serious injury results. Oftentime, along with physical injury or without, the victim suffers mental disturbance. Such damage is immeasurable. This is emphasized when the attempt to rob results in the death of the victim. Of course, in this case, the robbery would not be scored since the more serious offense, murder, would be reported and the robbery would serve as the motive. The placing of a dollar value, however, on the damage resulting from this type of offense is an attempt to measure that which is immeasurable.

FELONIOUS ASSAULT

DEFINITION

Felonious Assault, as defined under the West Virginia Uniform Crime Reporting Program, is an attempt or offer with unlawful force or violence, to do serious physical injury to another. Attempts are included since it is not necessary that any injury result when a gun, knife or other weapon is used which would result in serious physical injury if the crime were successfully completed.

The use or attempted use of a dangerous weapon in an assault or the serious injury inflicted by hands, fists, or feet separates this offense from those assaults categorized as "simple" and not felonious in nature.

The victim of an actual assault of this type may suffer serious injury or permanent disability and all assaults to kill and attempts to kill are recorded in this area. As with murder, the use of weapons to inflict these injuries make this offense a subject for analysis.

FELONIOUS ASSAULT SUMMARY

BREAKING AND ENTERING

DEFINITION

Under this Program, Breaking and Entering is defined as an unlawful entry or attempted forcible entry of any structure to commit a felony or larceny.

Data collection for this offense is further categorized as to forcible entries, unlawful entries where no force is used, and attempted entries.

As with other non-violent crimes, the motive of personal gain coupled with the element of opportunity, results in the commission of this offense by both the amateur and the professional perpetrator. Only the absence of confrontation and the use of force separate this crime from Robbery of the violent crime group. However, detection during commission many times results in confrontation of the victim by the perpetrator demonstrating why this offense is considered the most serious of the non-violent crime group.

The volume of this offense presents the police with a serious enforcement problem made more difficult in many areas by the lack of sufficient personnel to act as a deterrent and to provide successful solutions to these crimes.

BREAKING AND ENTERING SUMMARY

LARCENY-THEFT

DEFINITION

Larceny/Theft is the unlawful taking or stealing of articles of value without the use of force, violence, or fraud. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from autos, and the theft of auto parts and accessories. Motor Vehicle Theft is excluded from this category for crime reporting purposes, inasmuch as it is a separate Crime Index Offense.

Larceny offenses cleared by police are dramatically affected by the nature of the crime. As with other Non-Violent Crimes, opportunity and stealth, working in favor of the perpetrator and against police detection, reduce solutions for this offense.

As with other offenses against property, Larceny is primarily a crime of opportunity. Types of Larceny will differ in volume depending upon the opportunity for theft offered in a given area.

When average value is applied to the reported crimes in this category, the dollar loss to victims was $342. It is true that a portion of goods stolen was recovered and returned to the victims, but the relatively low percentage of crimes cleared by arrest, and the lack of specific identification characteristics on such property indicates these recoveries will not materially reduce the overall loss. In addition, many offenses in this category, particularly where the value of goods stolen is small, never come to police attention.

LARCENY/THEFT SUMMARY

1987

A total of 24,452 Larceny/Theft offenses were reported for 1987.

Larceny/Theft comprised 62.7 percent of the total for the Non-Violent Crime category and 58.8 percent of the total Crime Index Offenses.

August recorded the highest number of Larceny/Thefts with 2,295 offenses.

There were 1274.2 Larceny/Thefts per 100,000 population in West Virginia.

Larceny/Thefts from automobiles accounted for 5,564 (22.8%) of the total offenses.

The total dollar value for Larceny/Theft offenses was $8,362,001, an average of $342 for each offense; of the total offenses 8,376 were $200 and over in value.

A total of 5,519 Larceny/Thefts were cleared by arrest or exceptional clearance, a clearance rate of 22.6 percent. Adults were involved in 4,314 of the clearances.

There were 6,094 persons arrested for Larceny/Theft offenses; 4,052 of those arrested were males, 1,448 were under 18, and 5,331 were white.

WEST VIRGINIA ARREST DATA
1987

WEST VIRGINIA ARREST INFORMATION

The West Virginia Uniform Crime Reporting Program requires the monthly reporting of data concerning persons arrested in the state. A record of total arrest activity for criminal acts in both Part I and Part II crime classes is received from 310 county, state and municipal law enforcement agencies and is analyzed and arranged according to age, sex, race and ethnic origin or persons arrested. Traffic arrests, except Driving While Intoxicated, are not reported. A total of 63,485 arrests for Part I and Part II criminal offenses were reported during 1986. This was a decrease of 2,317 arrested over the 1986 figure of 65,802. Based on population estimates, there was a statewide arrest rate of 33.01 arrests per 1,000 persons in West Virginia. The arrest rate in 1986 was 34.21.

Since 1986 the number of persons arrested for Part I and Part II offenses has decreased 3.5 percent while the arrest rate has decreased 3.5 percent.

A person is counted on the monthly arrest report each time he or she is arrested or summoned. It should be kept in mind that the volume of arrests may vary from time to time due to the differences in local arrest procedures and policies. It should be noted that a person may be arrested several times during a given month for the same or different offenses. This occurs frequently for such crimes as drunkenness, disorderly conduct and similar offenses. A juvenile is counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be counted or when police or other official action beyond a mere interview, warning or admonishment is given.

These arrest figures do not indicate the actual number of individual persons arrested or summoned since, as has been pointed out, one person may be arrested several times during the month. However, arrest information is useful in measuring the extent of law enforcement activity in a given geographical area as well as providing an index for measuring the involvement in criminal acts by the age, sex, race and ethnic origin of the perpetrators.

Of all reported arrests for 1987, 16.0 percent were for Part I Offenses (Murder, Forcible Rape, Robbery, Felonious Assault, Breaking & Entering, Larceny/Theft and Motor Vehicle Theft). Analysis of Part I arrests indicates that Larceny, as in the past years comprised the highest percentage of all arrests of Part I crimes with 60.2 percent. The "Drunkenness" category comprised 19.2 percent of the total arrests for Part II Offenses. This represented a decrease of 1.0 percent over 1986. There were 10,270 arrests for drunkenness in 1987 compared with 10,702 in 1986.

Juveniles were involved in 9.4 percent of the arrests for 1987, compared to 9.6 in 1986. Female arrests were up 1.5 percent from 12,388 arrests in 1986 to 12,576 arrests in 1987.

Arrests by race show that 90.9 percent of the persons arrested were White while 9.1 were Black. Hispanics comprised .2 percent of all persons arrested in 1987.

VIOLENT CRIME

Arrests for crimes of violence (Murder, Rape, Robbery and Felonious Assault) on a statewide basis accounted for 14.9 percent of all arrests for Part I and 2.4 percent of the total arrests for all offenses. A further evaluation indicates that arrests for Felonious Assault were the most frequent, representing 65.7 percent of the total arrests for violent crimes, unchanged from last year.

PROPERTY CRIME

Property crime arrests (Breaking and Entering, Larceny/Theft and Motor Vehicle Theft) comprised 85.1 percent of all arrests for Part I offenses and 13.6 percent of all arrests.

The highest percentage of property crime arrests, 70.8 percent, occurred in the Larceny/Theft category. Larceny/Theft arrests decreased 2.7 percent, from 6,260 in 1986 to 6,094 in 1987.

NARCOTIC DRUG LAW ARRESTS

Information concerning arrests for narcotic drug arrests is collected and analyzed according to specific drug categories. During 1987, a total of 1,646 arrests were made for narcotic drug law violations, an increase of 22.9 percent over 1986. Evaluation of data reported for 1987 discloses that 17.8 percent of all persons arrested for narcotic drug law violations were under 21 years of age. Moreover, 5.0 percent of those arrested were under 18 years of age. Analysis of individual drug categories showed that the highest percentage of arrests, 43.5 percent, involved possession of marijuana. The lowest percentage of arrests occurred in the possession of other dangerous drugs and "synthetic narcotic" categories, amounting to 1.9 percent each. Further analysis shows that the arrests for sale/manufacturing of drugs accounted for 49.5 percent (815) and the arrests for possession of drugs represented 50.5 percent (831).

GAMBLING ARRESTS

Arrests for gambling offenses during 1987 amounted to 0.2 percent of all reported arrests for Part I and Part II offenses. Of those arrested for gambling, 82.8 percent were males. The highest percentage of arrests for gambling offenses, 17.9 percent, occured in the 25-29 age category. A total of 134 gambling arrests were reported during 1987, an increase of 3.9 percent from the 1986 figure.

LAW ENFORCEMENT EMPLOYEE DATA
1987

The Uniform Crime Reporting Program in West Virginia incorporates the collection of pertinent data relating to law enforcement entities of the state. Information regarding West Virginia law enforcement manpower, distribution, assaults against law enforcement officers, and the number of and circumstances surrounding the killing of law enforcement officers are discussed in this section.

This information is submitted monthly by municipal, county and state law enforcement agencies and is published on a semi-annual basis. Specific information concerning the number of law enforcement employees reflects the status as of October 31, 1987, and is limited to municipal, county and state law enforcement agencies currently reporting to the West Virginia UCR Program.

The determination of police manpower for any given area or municipality should be a subject of serious consideration. Such consideration, however, should be based on the numerous factors which create the need for police services. Some of these factors, discussed elsewhere in this publication relate to size, density of population, geographic location, character and proximity to metropolitan areas. The information in this section relates to reported law enforcement strength and should not be interpreted as recommended strength for any given entity. Such determinations should be made after objectively evaluating the need for police services based on the above factors.

The personnel of each law enforcement agency differ as to the demands and responsibilities placed before them. Many police officers are fully occupied with clerical tasks and are not free to perform active police duties.

SWORN OFFICERS

In 1987 West Virginia had 2,625 sworn law enforcement personnel, compared to the 1986 figure of 2,698. This is a decrease of 73 officers or 2.7 percent in the number of officers in the state. Rates based soley on sworn law enforcement personnel show that the state average was 1.4 officers per 1,000 inhabitants. Males comprised 96.0 percent of all sworn personnel, white females comprised 4.0 percent.

STATE POLICE

The West Virginia State Police reported a total of 528 officers. This is a decrease of 0.4 percent over last year's figure of 530 officers. The State Police had a rate of 0.4 sworn officers per 1,000 inhabitants (rural population only).

SHERIFF

County Sheriff's Departments reported a total of 628 sworn officers; a decrease of 3.7 percent over the 1986 figure of 652. Based on sworn personnel, this is a rate of 0.5 officers per 1,000 inhabitants (rural population only).

D.N.R.

The Department of Natural Resources reported 108 sworn officers; a decrease of 0.9 percent over the 1986 figure of 109 officers. These figures reflect a rate of 0.1 sworn officers for each 1,000 inhabitants (rural population only).

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED 1987

The killing of a police officer has an effect on society which reaches far beyond the overt act. Such occurrences constitute an immediate threat to the well being of the community and a serious breach of the internal security of the country. Today, a young person who considers a career in law enforcement must also consider the very strong possibility of being killed or assaulted by a member of the very same society he or she is sworn to protect. This deplorable situation should be a subject of serious public concern, for in truth, an attack on a police officer is an attack on society. The violence directed against law enforcement officers acting in the line of duty is clearly demonstrated by the following summary information:

A total of 175 Assaults on Law Enforcement Officers were reported in 1987, of which 38, or 21.7 percent, resulted in personal injury to the officer.

For every 1000 arrests, there were 2.8 Assaults, and for each 100 sworn officers there were 6.7 Assaults.

Personal weapons (hands, fists, feet, etc.) were used in 161 of the Assaults.

A total of 173 of the Assaults were cleared, a clearance rate of 98.9 percent.

WEST VIRGINIA
OFFENSE DATA
COUNTY - STATE - MUNICIPAL — DNR
1987

The computer generated output tables contained within this section were designed to facilitate quick reference of statistical crime information relative to the different reporting areas of the State of West Virginia. The data contained in each of the series of reports will be detailed on a page preceding each listing.

Each of the three reports are listed in county name sequence. Within each county, information is further detailed to show the activity experienced by reporting area, agency type and contributor. The general identifying descriptions which indicate the reporting areas are listed and defined as follows:

(Name) County Total—This line indicates the total activity of all reporting agencies within the indicated county. It may be expressed mathematically as:

County Total = Municipal + State Police + Sheriff + Department of Natural Resources
or
County Total = Municipal + Rural

Rural—This line indicates the total activity that was reported by rural law enforcement agencies within the indicated reporting area. It may be expressed mathematically as:

Rural = State + Sheriff + Department of Natural Resources

Sheriff—This line indicates the total activity reported by sheriff's offices within the indicated reporting area.

State Police—This line indicates the total activity reported by all State Police Detachments within the indicated reporting area. It may be expressed mathematically as:

State Police = State Police Detachment 1 + **SPD2** + **SPD3** +

Department of Natural Resources—For purposes of these computer generated reports, activity for the Department of Natural Resources is included with activity for the Sheriff's offices. A separate summary of DNR activity for each district appears in a later section of this report.

MUNICIPAL—This line indicates the total activity reported by all municipal law enforcement agencies within the indicated reporting area. It may be expressed mathematically as:

Municipal = Municipality 1 + **M2** + **M3** +

(City Name) Police Department—This line indicates the total activity reported by the individually specific police department

For comparative purposes, each reporting agency or area identified on the report details the activity experienced for the calendar year of 1987 and 1986 respectively. Also, the numerical difference and the percent change between the two years has been calculated and displayed on separate lines. All amounts are signed with a plus (+) or minus (-) sign to indicate whether the quantity has increased or decreased from 1986 to 1987. An asterisk (*) appearing on the percent change line indicates that due to no activity being reported for either 1987 or 1986, calculation of percent change was impossible.

It should be noted that statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of West Virginia and project a state-wide view of crime. Awareness of the presence of certain crime factors, which may influence the resulting volume and type of statistics presented, is necessary if fair and equitable conclusions are to be drawn. These crime influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime experience of that community. Attempts at comparison of crime figures between communities should not be made without first considering the individual factors present in each community.

CRIME INDEX REPORT

The tabulations in this section indicate the volume and distribution of crime in West Virginia on the basis of a crime rate.

The Uniform Crime Reporting Program utilizes seven crime classifications to establish a rate to measure the trend and distribution of crime. The number of actual offenses of murder, forcible rape, robbery, felonious assault, burglary, larceny and motor vehicle theft are reflected in this report. The number of actual offenses of manslaughter and assaults (not aggravated) are not index offenses, thus counts of these offenses are not considered in this report. Arson, the eighth Crime Index Offense, is examined in a separate section.

Each heading contained in this report is defined below.

Population—Estimated population of the indicated reporting area. This information, representative of the year 1987, was provided through the assistance of the Federal Bureau of Investigation and the United States Bureau of Census.

Total Offenses—This is the sum total of the seven Index Offenses.

Total Cleared—The sum total of the seven Index Offenses cleared.

Percent Cleared—The percentage of Index Offenses cleared by arrest or exceptional clearance.

The mathematical formula may be expressed as follows:

$$\text{Percent Cleared} = \frac{\text{Total Index Offenses Cleared}}{\text{Total Actual Index Offenses Reported}} \times 100$$

Crime Rate—This is sometimes referred to as a victim risk rate and is representative of the number of Index Offenses per 1,000 population.

Example - A crime rate of 10.00 would imply that 10.00 persons of each 1,000 population were the victim of an Index Offense.

The mathematical formula for calculating the crime rate of any reporting area may be expressed as follows:

$$\text{Crime Rate} = \frac{1{,}000}{\text{Area Population}} = \text{Reciprocal}^{*} \times \text{Total Actual Offenses}$$

$$\text{Crime Rate} = \frac{\text{Total Actual Offenses}}{\text{Area Population}} \times 1{,}000$$

*Reciprocals developed to five (5) decimal places.

The remaining columns of the report indicate the number of actual Index Offenses reported by category.

A separate section is provided to summarize offense and arrest data for the Department of Natural Resources on a District basis. This section is provided because Department of Natural Resources data is included in the category of Sheriff on the proceeding computer printed pages.

DOMESTIC VIOLENCE

The increasing incidence of abuse between family members prompted the enactment of House Bill 802. This bill mandated the collection of domestic violence statistics. Information on spouses, persons living as spouses, persons who formerly resided as spouses, parents, children and stepchildren, or other persons related by blood or marriage is collected.

Abuse: The occurrance of one or more of the following acts between family or household members who reside together or who formerly resided together.

1. Attempting to cause or intentionally, knowingly or recklessly causing bodily injury with or without a dangerous or deadly weapon.
2. Placing, by physical menace, another in fear of imminent serious bodily injury.
3. Sexually abusing a person under the age of 18 years.

The following information on Domestic Violence is in compliance with House Bill 802. Collecting the information on Domestic Violence began on July 1, 1981.

Law enforcement agencies reported they received a total of 1,341 complaints on Domestic Violence for 1987. This represented a 2.5% decrease over the 1986 figure of 1,375.
